

THE DT 418 TRANSMITTER

INDIVIDUAL CODING

BLOCK CODING

SOFTWARE INTEGRATION

The Elite Transmitter operates at 418Mhz and uses over 16 million different codes. These compact transmitters are programmable via ElitePro™ Software and eliminate the dip switch technology for higher security. The ElitePro™ Software lets the programmer update and maintain transmitter information remotely. Each tenant can have up to 10 different coded transmitters with individual expiration date and time zone restrictions. If one remote is lost, it is possible to locate the lost transmitter code and erase it through the software. Elite transmitters are fully integrated into the exclusive software for remote programming with the convenience of either single transmitter programming or block coding (programming remotes in groups).

COMPACT DESIGN

Elite transmitters are designed to be small enough to fit in the palm of your hand and still deliver 418Mhz of power.

VISOR CLIP

Elite offers an optional visor clip designed exclusively to hold the DT 418™ series.
